

This is one of the best \$10 I spend each month. I rarely tune in to AM or FM because they do not offer anywhere near the programming that I prefer. I commute between two markets and many times, I need to switch stations on standard AM. I listen to commercial free programming. I feel better when I arrive at work because I'm not depressed from all the bad news that standard stations dwell on. My productivity is up because of XM radio. I plan to also add XM to my home, but just haven't got around to it. I'm loving it. Please reject the NAB's petition 04-160 and allow me to continue to listen to what I want to.
